Languages: Java, C#, Python, HTML5, CSS3, Problem Solving, Project Management, Communication.

PROJECTS

SMART CAMPUS WASTE MANAGEMENT SYSTEM USING IoT TECHNOLOGY	Aug 2024
- Developed a Smart Dustbin using IoT devices like Arduino, ESP32, etc., With the help of these IoT devices we can easily manage to test the levels of smart dustbin. - By using the Ultrasonic sensor we can easily detect the movement of people and so the bin will be opened automatically. Tech Stack: Arduino C, MySQL.	
ADMIN SERVICE SYSTEM FOR SHOPPING MALL USING SPRING BOOT	July 2025
- Developed a Spring Boot based RESTful API application with database integration and tested endpoints using Postman and handled errors with basic validation. - Gained hands-on experience with Spring Data JPA, REST API's, and backend development best practices. - Documented the project for easy setup and use in the GitHub repository. Tech Stack: Core Java, MySQL.	

INTERNSHIP

WEB DEVELOPMENT INTERN	March 2024
SystemTron	
During my internship, I had the incredible opportunity that improved my skills in Python programming.	

- I actively contributed to implemented projects that involved creating responsive Applications and enhanced user experience.

CERTIFICATIONS

- **Cloud computing** – NPTEL
- **Ethical Hacking** – Great learning
- **Design Thinking** – Infosys Springboard
- **Front End Development- CSS** – Great Learning
- **UI/UX for beginners** – Great Learning
- **Python pandas Basics course** - Simplilearn
